

2019
MALVERN BANK SUPER LATE MODEL
(MBSLM) RULES
Revised 12/28/2018
Revised 3/4/2019
Revised 6/21/2019

For any verification please contact the I-80 Speedway office
Office: 402-342-3453 or office@i-80speedway.com
Rick Holling: 402-515-1635 or ricotech92@cox.net

The rules and/or regulations set forth herein are designed to provide for the orderly conduct of racing events and to establish minimum acceptable requirements for such events. These rules shall govern the condition of all events, and by participating in these events, all participants are deemed to have complied with these rules. NO EXPRESSED OR IMPLIED WARRANTY OF SAFETY SHALL RESULT FROM PUBLICATIONS OF OR COMPLIANCE WITH THESE RULES AND/OR REGULATIONS. They are intended as a guide for the conduct of the sport and are in no way a guarantee against injury or death to a participant, spectator or official.

1. Raceceivers are mandatory.
2. SLMR membership is \$150 it is not required but is the ONLY way you can receive point fund money, contingencies awards, and your allotted Provisionals throughout the year.
3. Standard Motor Rule (See weight rules) including all open motors
4. Video footage at the race facility is property of Malvern Bank SLMR series, it can't be placed on YouTube, Facebook, and any other social media outlets without consent from Malvern Bank SLMR series. Except a track share profit Pay-Per-View TV.

2019 SAFETY/GENERAL RULES ALL CARS ARE ELIGIBLE TO RACE WITH THE 2017 SAFETY RULES (SEE BELOW)

ALL CARS ARE ELIGIBLE TO RUN IN 2019. General safety rules 1 through 12 must be followed regardless if you are running the 2017 or 2019 rules package. All cars running the 2017 safety rules (See below) will not be able to receive their third provisional after 10 races, will have \$500 subtracted from whatever position in the year-end point fund, and \$50 will be deducted from each advertised position in the A-Feature. Series members will still be able to receive 2 Provisionals, points all season long, and contingency money (including Hoosier Hard Charger). Rules 13 through 19 will be the must have 2019 safety rules that determine whether you are deducted bonuses (Previously listed). The 2017 rules are the bare minimum for rules 13-19.

1. Helmets must be SFI 31.1/2010 or Snell rated SA2010 or SA2015 helmet required. (no open face helmets).
2. All drivers must wear approved fire-retardant racing gloves SFI 3.3/5 at all times when the car is on the track.
3. All cars must have seat belts and shoulder harness securely fastened to the frame or roll bar. They must be of the approved racing type with quick release aircraft type hookups. NO stock type seat belts allowed. Shoulder harness must be securely mounted to the roll cage no higher than TWO inches above shoulder level. Sternum straps are highly recommended. All cars are required to have 3" lap belt, crotch belt and 3" shoulder harness recommended to be no more than one year old. Unless approved 2" shoulder harness while using a HANS device. Belts must be no older than 3 years on the production date.
4. All seats must be mounted properly & securely per the Technical Directors recommendations. The use of Grade 5 or better hardware is also required to attach the seat to the chassis with minimum four mounting bolts (3/8 inch or bigger). Seat mounting brackets must use properly sized bolts 3/8 inch or bigger with washers to match the holes in the mounting bracket. No oversized holes or slotted holes in the bracket.
5. Fire suits of at least a fire-retardant material are mandatory. (SFI 5 is the recommended minimum.) Sleeves must be rolled down. Nomex underwear is highly recommended, including hood and socks. Race approved footwear (leather shoes) are highly recommended.
6. All roll bars within the driver's area are recommended to be padded with flame retardant foam roll bar padding.
7. Solid center steering wheels are highly recommended.
8. Arm restraints or a 16x20 window net are highly recommended.
9. Ballast (extra weight) added to the car for weight rule conformance must consider all provisions of safety and must be securely fastened. Ballast must be bolted to the frame or cage only. No ballast may be mounted above the interior deck to rub rails or body mounts. Any ballast weight of 20 lbs. or more must be drilled and mounted with two 1/2" studs through each weight. No ballast blocks less than 5 lbs. nor more than 60 lbs. will be allowed. No stacking of ballast. Ballast must be painted white and stamped with your car number (this is a maintenance item and must be maintained all year.)
10. No unapproved cameras, listening or transmitting devices, timing retard controls, or digital gauges, digital tach is ok. No

electronic monitoring computer devices capable of storing or transmitting information except analog tach. No electronic traction control devices. No cameras of any type permitted below the interior (deck) of the car.

11. Eighteen-gauge steel or one-eighth inch aluminum "cockpit tub" to protect front, sides and rear of driver is highly recommended.
12. No car covers or opening covers of any kind allowed. Exception: If rain or inclement weather occurs you may cover your car until the weather passes and/or the rain stops. Including tires.
13. **Head and neck restraint devices such as a HANS or similar are required.**
14. **Must use a full containment SFI 39.2 rated racing seat.**
For drivers that need more room for entrance and exiting the racecar check with the ISPseat Company on seat parts number ISP 202LA L quick release helmet belt and the ISP 202M mounting bracket. No head support may be trimmed any shorter than the distance of the face of the helmet on the LEFT SIDE ONLY.
15. **10-pound Fire Bottle or Safecraft suppression system with the thermal hoses running to the driver's cock pit and one to the fuel cell will be required.**
16. **Fuel Cell: see Section 3 – Rule 5**
17. **Window Bars: see Section 4 – Rule 2**
18. **Battery: see Section 9 – Rule 2**
19. **Door Plate: see Section 4 – Rule 6**
20. **If you run the 2017 safety rules (rules 13-19 above) you will have \$50 deducted from your A-Feature payout.**

2017 SAFETY RULES ALL CARS ARE ELIGIBLE TO RACE.

All cars are eligible running the 2017 safety rules will not be able to receive their third provisional after 10 races, will have \$500 subtracted from whatever position in the year-end point fund, and \$50 will be deducted from each advertised position in the A-Feature. Series members will still be able to receive 2 Provisionals, points all season long, and contingency money (including Hoosier Hard Charger).

1. Head and neck restraint devices are recommended such as a HANS or similar. A minimum of a full wrap around neck brace is required.
2. Aluminum racing seat. All seats must be mounted properly & securely per the Technical Directors recommendations. The use of Grade 5 or better hardware is also required to attach the seat to the chassis with minimum four mounting bolts (3/8 inch or bigger). When not using a full containment seat you are required to use one of 2 options: Option 1: two head supports (left & right side) The left side may be shorter for egress only but cannot be trimmed any shorter than the distance of the face of the helmet. Option 2: The ISP seat parts number ISP 202LA L quick release helmet belt and the ISP 202M mounting bracket.
3. All cars are recommended to use a window net 16x20 rectangular shape mesh or ribbon style, must be mounted in accordance with the manufacturer's instructions and technical director's satisfaction, must latch at the top. Window net will not be required but recommended when using a full containment seat and a HANS (or similar) device. Arm restraints highly recommended.
4. A fire extinguisher, in working order and up to date, will be required in your race car. Recommended when purchasing a new fire extinguisher to purchase the 10-pound fire bottle or safe craft suppression system with the thermal hoses running to the driver's cock pit and one to the fuel cell. (a 10-pound bottle may be required in the future)
5. **Door plate is required in 2019 but you will be allowed to run up to 5 MB SLMR series races without it.**

SECTION 1: WHEEL BASE, SHOCKS, SPRINGS AND SUSPENSIONS

1. The minimum average wheelbase is 103 inches. With ¼" tolerance.
2. Shocks must be constructed of aluminum or steel. Canister shocks are permitted.
 - A. The only external connection allowed to the shock is a single hose to a single remote canister with the option of a compression adjuster in the canister.
 - B. Compression adjuster and/or canister cannot be mounted within the reach of the driver.
 - C. Only 2-way compression/rebound adjustable shocks are permitted no 3 or 4 way adjustable.
 - D. Air shocks will only be allowed to attach on the left rear of the racecar. Air or gas shock on the left rear will be the only shock on the car without a compression rule. All other gas or hydraulic shocks on left front, right front, right rear, or 5th arm will need to be compressible by hand once spring has been removed and set in race setting.
3. No cross connected shocks are allowed.
4. No "RodThrough" designs are allowed.
 - A. "RodThrough" shocks are defined as those shock absorbers in which the piston rod protrudes from both ends of the shock body.
5. No Inerters are allowed
 - A. No rotating parts inside the damper.
 - B. No Inerter style dampers, either mechanical or hydraulic, or other type of primarily acceleration sensitive damping devices not permitted.
6. No Electrical adjusted or active dampers are allowed. No electrical wires, transmitting or receiving components will be allowed to be attached internally or externally to the dampers or mounted inside any component or dampers. No portion of the racecar including and not limited to shocks and spring components or chassis components may have the ability to

communicate transfer/transmit/receive any type of digital or analog data or any language and or adjust or monitor in any way whatsoever including but not limited to a variation of a wireless remote device/phone/computer/tablet/iPad or a mechanical remote device.

7. Any new chassis design or component designs pertaining to and/or but not limited to shock absorber mounts must be submitted to Malvern Bank SLMR series/I-80 Speedway for approval before they will be permitted for use in competition. Manufacturer and/or competitor may be required to disassemble for complete inspection before instatement of new part is permitted.
8. Stacked coil spring permitted. Leaf Springs will be permitted on rear end only.
 - A. Coil Springs must be made of magnetic steel. Leaf Spring must be made of magnetic steel of approved composite material.
 - B. One traction spring and one brake spring mounted to the torque arm is permitted.
 - C. Torsion bars are not allowed in rear of car.
 - D. Spring preload adjustments for coil springs must be made using mechanical adjusting nuts on the shock body.
 - E. Spring preload adjustments for leaf springs must be made using a mechanical adjusting device such as an adjustable shackle or threaded rod type mount.
 - F. Other than spring dampening by the shock absorber, hydraulic, pneumatic, or electrically controlled adjusting devices, (static or dynamic) that affect spring preload or race car heights will not be permitted.
9. Shock Locations
 - A. Only one shock per wheel is permitted at the left front, right front, right rear corners.
 - B. Left rear must have one shock behind the axle tube and may have one traction (dummy) shock on the front side or top of axle tube. Must mount vertically to the birdcage or clamp bracket.
 - C. One 5th Coil Shock permitted.
 - D. One 90/10 optional shock may be mounted above lift arm on upper lift arm plates. Must be mounted towards the front of the car lying parallel with the car. Shock must mount within 3" of the centerline of the rear ends center section.
10. Drop Chain (limiting chain) is permitted. Must mount vertically between frame and a clamp bracket.
11. Bump stops and/or bump springs are permitted.
12. Suspension covers are not allowed. Rear covers on racecar are not allowed outside of your pit area. Spring and/or shock covers are permitted, but must be fastened directly to the spring or shock.
13. A Swing Arm and/or Z Link suspension is permitted as long as the Top and Bottom solid links are mounted on heims and run in the opposite directions of the bird cage. The Shock on a Swing Arm or Z Link rear suspension may mount to the bird cage or the bottom radius rod.
14. Any new chassis design or component design and or technology pertaining to and/or containing suspension must be submitted to I-80 Speedway for approval before they will be permitted for use in competition. Manufacturer and/or competitor may be required to disassemble for complete inspection before instatement of new part is permitted.
15. Suspension and/or rear end parts can be made of steel or aluminum. Aluminum mounting brackets are permitted. Must be A-frame type.
16. Frame and/or suspension mounts must be welded or bolted solid to the frame and not move. Ie Floating, sliding, pivoting and/or rotating mounts and/or brackets of any sort are not allowed.
17. Bolted components must match the correct bolt size with the hole (for instance no 3/8 bolts in a 1/2-inch hole will be deemed illegal) and be torqued to a min of 40-foot pounds per inch
18. Rear Suspension Mounts.
 - A. All chassis mounts must be double sheer.
 - B. Double sheer mounts must be 1/8" minimum steel and/or 1/4" minimum aluminum.
 - C. Sheer mounts must use minimum 5/8" rod ends with minimum 1/2" grade 8 bolts only. The bolt must be bolted through both sheer mounts.
 - D. Double sheer mount must be no wider than 4 inches with a minimum 1/2" inch grade 8 bolt with steel or aluminum spacers only.
19. Only one (1) mechanical traction device is permitted. Only one (1) pull bar or one (1) lift arm is permitted. No other options are allowed. Covers of any sort in any relation to the lift arm or pull bar are not allowed.
20. Lift Arm & Pull Bar
 - A. Floating, pivoting and/or rotating mounts and/or brackets of any sort (connected to and/or associated with the pull bar or lift arm) are not allowed.
 - B. Lift arm is defined as a steel or aluminum triangulated bar that is connected at the top and bottom of the rear end housing, extending forward where it is connected to a shock, shock spring coil over combination and a limiting chain. One stabilizer bar is permitted to locate the front of the lift arm from left to right in the car.
 - C. 6th coil or braking spring assemblies are permitted, must be in front of 5th coil shock.
 - D. Pull bar is defined as a continuous assembly that is connected to the top of the rear end and extends forward to a solid mounting point located on the chassis. The mounting location at both the front and rear of the pull bar may be adjustable but must remain constant during competition (cannot be adjustable from the cockpit).
21. Radius Rods
 - A. All rear suspension radius rods must be of a fixed length. No hydraulic cylinders, torsion bars, bump rods, spring rods, slider rods or shock type radius rods are permitted.
 - B. Radius Rods must be a minimum of 1" diameter OD. Rods can be round, square, or hex shaped. Rods must be a minimum of .095 steel or .120 aluminum in tubing thickness.
 - C. Heim joints must be a minimum 5/8, and a maximum 3/4" steel heims. No rubber bushings.

- D. ONLY Two (2) radius rods per side.
1. Radius rods must be spaced on the frame a minimum of 6"
 2. Radius rods must be spaced on the birdcage a minimum of 6" and a maximum of 12"
 3. Measurements will be made from center of each radius rod bolt.
 4. All radius rods must be straight with the exception of the left lower that can have a bend for axle housing mount clearance.
22. Axle Housing Mounts (Birdcages)
- A. Birdcages must be made of aluminum or magnetic steel, no exotic materials. Birdcages don't have to be made of the same material from side to side.
 - B. Birdcages may consist of multiple barrels but must bolt or weld together to work as single barrel birdcage.
 - C. Limited one birdcage (1) per side.
 - D. Shock(s) and radius rods must mount to the birdcage.
 - E. Floating, pivoting and/or rotating mounts and/or brackets of any sort are not allowed. All brackets or mounts attached to the birdcage must be bolted or welded solid.
23. Rear Suspension and Suspension Components:
- A. Axle Housing, Rear Differential
 1. The axle housing must be of the "closed tube" design utilizing "full floating" magnetic steel axle shafts.
 2. The center section of the axle housing must be manufactured of either aluminum or magnesium.
 3. Axle tubes must be one (1) piece. Axle tubes must be manufactured of aluminum or magnetic mild steel. Axle tubes manufactured of exotic, heavy materials will not be permitted. The outside diameter of the axle tubes must not exceed three (3) inches. Axle tube internal inserts or external sleeves will not be permitted. The addition of any ballast weight to the axle housing will not be permitted.
 - B. Axle Housing Mounts
 1. The only materials used to fabricate axle housing mounts (birdcages) that will be permitted is aluminum or magnetic mild steel. Axle housing mounts fabricated of exotic, heavy materials will not be permitted.
 2. When fabricating axle housing mounts detail must be paid to functionality. The completed axle housing mounts, when comparing the right and the left side, must be as similar in design as possible.
 - C. Rear Suspension Attaching (Radius) Rods
 1. The only materials used to fabricate attaching (radius) rods that will be permitted are magnetic steel or aluminum
 2. Aluminum attaching (radius) rods may be solid or tubular material. Magnetic steel attaching (radius rods) must be tubular with a maximum wall thickness of 3/16 inch.
24. Shock, Spring, and Suspension Penalties and Infractions: If violations are found during prerace technical inspection: The driver and or team will receive a warning and must meet full compliance before being allowed to compete. If a violation is found after qualifying has started technical inspection: No Winnings, Points, will be paid and a fine of \$1,000 may be assessed to the violating team and or driver.

25. DROOP RULE

We are looking real hard into using the droop rule in 2019. We do not know the specifications of how we will tech this rule yet. But is a possibility sometime during the 2019 season this will be implicated.
<https://www.youtube.com/watch?v=7xAduiR4mzU> this is the link that will help you understand the droop rule if you aren't already familiar with it.

26. One mechanical power steering pump permitted. Electronic steering components are not permitted.

SECTION 2: ENGINES

- A) Any motor may be used restrictors and weight rules will serve as equalizers. See weight rules.
- B) GM crate motors See weight rules.
- C) IMCA/Wissota engines must pass all IMCA/Wissota spec rules, ~~including carburetor spacer plate~~ (see weight rule options).
- D) Engine Set-Backs
1. All competing models using an engine larger than G.M. 361 cubic inches, including 525 crate, or Ford, or Chrysler larger than 364 cubic inches are allowed a maximum engine set back of 25½ inches (to be measured on the left side of the engine, from the front side of the rear engine plate, to the center of the upper A frame/control arm mounting bolts which should be equal to the center of the ball joint)
 2. All competing models using a Ford or Chrysler engine 364 cubic inches or smaller or a G.M. Engine 361 cubic inches or smaller including 602 & 604 crates are allowed a maximum engine set back of 27 inches using the same measuring technique as listed in section a.
 3. **For any fraction beyond the measurement listed in 1 and 2 above there will 25 lb. penalty to be placed in front of the rear motor plate up to each ½ inch increment beyond that will be an additional 25 lbs.**
- E) Steel Head Engine Rules (Small Cubic Inch)
1. Only O.E.M. stock production steel heads as numbered below will be allowed.
 2. No Dart, fuel injected, Ford Cleveland, or GT40 heads allowed.
 3. The specified (spec.) head will be the G.M. BOWTIE non-vortec cylinder head, part/casting number 10134392,

14011058, 12480034, or 14011034. Chevrolet Performance Vortec Part number 12558060. Casting number 12039906 or 12558062 that have a 64CC combustion chamber, a 170CC intake port, No alterations to the head including porting or polishing and valve size must remain stock. 1.940" intake valve and 1.500" exhaust valves are legal. You must use intake manifold Edelbrock 2716. Vortec Small port only with intake runner volume 185cc and exhaust runner volume of 65cc. Absolutely no large port Vortec bowtie heads.

4. Ford M-6049-n351, Mopar head casting number 4532693. Mopar may run Chrysler R block #P4532907 or P4532908. Mopar heads may be 15 or 18 degrees. O.E.M. J Design Mopar heads are not legal. No modification outside of the combustion chambers, except surfacing, three angle valve jobs, and touching up the combustion chamber. Titanium valves and retainers allowed.
5. **All cylinder heads under rule E3 and E4 listed above must remain with their stock production valve centers.**
6. Roller camshaft, lifters, and rocker arms will be allowed. Shaft rockers will be allowed.
7. Any aluminum intake may be used with a maximum total height of 6" from top of intake to the floor of the plenum. Up to a 2" spacer may be included in the 6" height. No super highrise intakes allowed. Plenum must have flat floor.
8. May run up to and including the Holley 4150 series 850 c.f.m. carburetor.
9. No titanium engine parts, except titanium valves and retainers.
10. Engine casting numbers stamped on the engine will be left on the block at the bell housing area.
11. No epoxying of block numbers will be allowed. Block numbers will be stamped by inspector if needed

Engine Claim Rules:

1. GM 602, GM 604, & GM CT525 are all susceptible to a claim.
 - A. GM 602 = \$3000 **US cash in denominations no smaller than \$20 bills** claim, as purchased from GM no extra components
 - B. GM 604 = \$5000 **US cash in denominations no smaller than \$20 bills** claim, as purchased from GM, no extra components
 - C. GM CT525 = \$6000 **US cash in denominations no smaller than \$20 bills** claim, as purchased from GM, no extra components
2. Claimer must pay an additional \$50 **US cash** for removal fee to the claimer or for wrecker service.
3. Any driver, or their owner, or crew member * **MUST BE A PAID MALVERN BANK SLMR SERIES MEMBER** * competing in a feature event (A feature, must take a lap) are eligible to claim engine A-B-C (see above) Cars being claimed must have finished in the top 5 A feature positions. **You don't have to be a Malvern Bank SLMR series member to have your engine claimed.**
4. Malvern Bank SLMR series has the right to impound or claim the crate engine of any competitor at any time. If the engine has non-approved modifications, the engine may be confiscated by the Malvern Bank SLMR series and driver/owner fined.
5. **Engine Claim notification must be done within 10 minutes of the drop of the checkered flag to one of the Malvern Bank SLMR series officials that is connected by radio to race director or tech officials. Money must be presented within 10 minutes after the notification of the claim. Money does not have to be on the driver in the race car before the claim is in process.**
6. **DISCLAIMER:** If a **paid Malvern Bank SLMR series member's** car needs to compete the following night(s) in the SLMR series or a NASCAR event the motor will be taken out after the second or third night of continuous competition. **Non-Malvern Bank SLMR series members whose engines have been claimed will be pulled the night of the claim, regardless if they plan to race the next night.** The engine will be marked, serial numbers, and pictures of seal bolt will be taken the night of the claim. After the conclusion of the event(s) the claimer can decide to cancel the claim if the claimer & Malvern Bank SLMR series official agree the motor shows to have problems or sabotage.
7. If the driver denies the claim or the claimed engine shows any sabotage at any time during a claim the claimed driver will lose all points and earnings for that event and the previous event(s) in the claimed time period, a \$500 fine, will lose all points for the season and 3 nights of MBSLMR competition (not to go over into the next year). You will not be able to receive any winnings or contingencies until the fine has been paid. In the event of the deny or sabotage the claimed driver will not be able to compete in the MBSLMR with a claimable engine option (A-B-C- above) for 1 calendar year.
8. The claimer is not required to run this engine at any upcoming MBSLMR events.

SECTION 3: FUEL AND FUEL PUMPS

1. Racing Gasoline Only with no oxygenated Additives (Preferred VP 110 or VP Late Model +) No propylene.
2. **Crate Motors (GM602, GM604) will be allowed to use commercial pump gas up to E-85. Check weight penalty.**
3. **When running tracks north of US Hwy 20 in Iowa and South Dakota (doesn't include Nebraska) alcohol will be permitted on the Wisconsin Motors. 0.050 of 2 restrictors will be subtracted of the 4 restrictors and 25 lbs. of additional weight in block form will be added in front of the engine plate including any other weight penalty.**
4. All testing with the digitron dielectric meter is the responsibility of the driver or owner before the races if you are in question of your reading.
5. Commercially manufactured fuel cells mandatory, The only fuel cells that are approved are those that meet and/or exceed the FIA/FT3 specifications, NO alterations (example: alterations to top plate, removal of foam, etc.). fuel cell capacity may be from 5 to 32 gal including fill spout. You may purchase a kit to make existing fuel cells FIA/FT3 legal. Fuel cells that are not contained within a welded steel tubing "rack" must have two (2) equally spaced steel straps that measure two (2) inches wide by 1/8 inch in thickness that completely surround the fuel cell. The straps must be bolted to the frame.

Longitudinal (front to rear) orientation is recommended for strap mounting. Fuel cell cannot extend below rear end tubes.

6. Fuel cells must have non-vented caps, rollover valves in return and vent lines, must pick up from the top of the fuel cell. Willy's Carburetor roll over plate part #WCD4000 is approved for competition.
7. Fuel cell guard must be made of at least 1" tubing and must extend to the bottom of the fuel cell.
8. No electrical fuel pumps allowed. (Belt driven fuel pumps or mechanical pumps will be permitted)

SECTION 4: WINDSHIELD SCREENS ROLL CAGES. FRAMES

1. All main cage and door bars must be 1.5" od x .083 wall minimum.
2. Bars in the windshield area will be required from left 1 ½ inch down tubes to right 1 ½ inch down tubes connecting roof hoop to the cowl area there must be ½ inch tubes (vertically mounted) spread a maximum of 6 inches. We also recommend a screen across the full area from left 1 ½ inch down tube to right 1 ½ inch down tubes, no bigger than 1x1 squares and no smaller than ½ x ½ squares across the whole front area.
3. All cars are required to use a roll cage with at least 3 horizontal bars across the driver's door.
4. All competing models will be required to have a vent window bar and a bar in the center of the roll cage over the driver's head.
5. All cars will be required to have a bar to protect the driver's feet.

6. Mandatory Door Plate

A collective effort of chassis manufacturers; crew chiefs; engineers and racers have provided the following images and developed two additional intrusion plate designs which have been approved for competition.

DIRECT WELD – INDIVIDUAL PLATES

A minimum 1/8" (.125") thick magnetic steel intrusion plate on the driver's side door bars is mandatory. Individual plates between door bars are permitted but must be weld around the perimeter.

APPROVED FOR COMPETITION: WELDED TABS/BOLT ON PLATE

Minimum 1/8" (.125") thick magnetic steel intrusion plate measuring a minimum of 16" x 26".

Intrusion plate must be bolted to fabricated 1/8" (.125") magnetic steel tabs, welded securely to the chassis, using a minimum of eight (8) x 3/8" Allen button head bolts.

A minimum of three (3) fabricated 1/8" (.125") magnetic steel tabs and 3/8" Allen button head bolts required across top of the intrusion plate, a minimum of three (3) fabricated 1/8" (.125") magnetic steel tabs and 3/8" Allen button head bolts required across the bottom of the plate, and one (1) fabricated 1/8" (.125") magnetic steel tabs and 3/8" Allen button head bolt in each in the middle front and middle rear of intrusion plate.

APPROVED FOR COMPETITION: INDIVIDUAL DOOR BAR CLAMPS/BOLT ON PLATE

Minimum 1/8" (.125") thick magnetic steel intrusion plate measuring a minimum of 16" x 26".

Intrusion plate must be bolted to a minimum of six (6) approved-design door bar clamps using the included 12 x 1/2" Allen button head bolts per the manufacturer's specification.

fins.

D. Intake Manifolds on a Wide Bore Engine may configure to be taller than 6" with a 1" spacer & a 1" restrictor/governor. If this motor seems to have more horsepower due to the heightened intake there will be a shorter restriction put on the spacer plate.

E. Intake manifolds may be used with a maximum total height of 6" from floor of plenum to the opening of the carb spacer pad. Intake manifolds must have a minimum of a 3.500-inch opening in any direction front to back or side to side at the top of the carb spacer pad to the base of the plenum which must be flat and contain no obstructions except for the blades of the runners. Intake manifold height is 6" including any spacer to the carb pad including gaskets when not using the restrictor/governor plate.

F. When using the 1" restrictor/governor, the measurement from the top of carb pad, including gaskets, will be allowed a total height of 6 1/2-inches on the inside of the intake manifold to the base of the plenum.

5. **A. You may use 1 or 2 Spacer plates not including your restrictor/governor plate to hit maximum intake height. Spacer plates may be open style or 4-hole spacer plate, must be unaltered and be a cataloged part number through Keyser Manufacturing/Port City, Speedway Motors, or Wehrs Machine and purchasable for all competitors, with zero tolerance taper to enhance or increase the airflow to the engine.**
B. Carburetor blending plates from Wehrs Machine, part number WM10100R 1" (part number must be legible at all times, no grinding or enhancing of plate, must remain stock), may be used under the 1" governor/restrictor plate. The only tapered blending plate that will be allowed will be the Wehrs Machine cataloged part number WM10100R 1". May be used on any motor with no alteration to the plate. No weight penalty will be assessed when using this plate.
6. No onboard computers, micro-controllers, processors, automated electronics, recording devices, Electronic memory devices, memory chips, or digital readout gages of any kind permitted. Digital Tachometers will be allowed.
7. Only one (1) electronic firing module amplifier is permitted, if used.
8. **You will only able to run off one firing option, crank trigger or distributor one MUST BE unplugged and not changeable within reach of driver or within driver cockpit. Changes must be done under the hood.**
9. Only one ignition coil permitted.
10. NO Traction Control of Any Kind.
11. (1) MSD box #TBD will be used in place of the computer on the CT525
12. **There will be a competitor or track protest rule within 10 minutes after the A-Feature checkered flag for \$600 for one cylinder head or \$1,000 for both cylinder heads for IMCA, Wissota, SB2, GM Crate or factory steel untouched heads. This rule only applies on a weekend race no later than a Sunday with the next sanctioned MBSLMR race being no earlier than a Friday. IMCA and Wissota heads will be sent to Brodix to be ensured they are stock approved heads for each series. SB2, GM Crate, or factory steel untouched heads will be sent to Speedway Motors to be checked for illegal porting or air flow increase.**
13. **A competitor can only protest the same competitor one time during the season.**
14. **When running SB2 heads they may be tested with a chemical, such as ether, to check for increased outside air flow. We are looking at taking the SB2 engines out of series competition in the near future, no later than the end of 2021.**

SECTION 7: CLUTCH, FLYWHEEL AND BELL-HOUSING

1. High speed multiple disc clutches are permitted.
2. All cars must be able to be put in and out of gear with the engine running and the car sitting still.
3. All competing models must be equipped with a flywheel and an operable starter.
4. A production manufactured steel bell housing or a heavy-duty explosion proof aluminum bell housing may be used on all models.

SECTION 8: TRANSMISSION, DRIVE-SHAFTS, REAR AXLES AND REAR TREAD WIDTH

1. OEM. Production manufactured 2 to 4 speed transmissions that are cataloged through dealer channels will be permitted. Bert, Brinn, and Falcon circle track transmissions are permitted.
2. All transmissions must have at least 2 speeds forward and one reverse.
3. No 5 speed, over drive or automatic transmissions allowed.
4. All transmissions must bolt directly to the rear of the bell housing which bolts directly to the rear of the engine block.
5. All drive shafts must be painted white.
6. All cars must have a 360-degree hoop toward front of drive-shaft, made of at least 1/4" by 2" steel strap.
7. It is recommended to have a drive-shaft safety hoop built out of 4 or 5-inch diameter by 6-inch-long round tubing.
8. Full floating rear ends are compulsory. Rear end must be quick-change type and track approved.
9. Rear end coolers may be used, but cannot be mounted inside of the driver's compartment.
10. No open tube rear ends allowed.
11. No cambered rear ends permitted.
12. The rear tread width can be no wider than the front tread width. (Both sides)
13. Axles must be made of steel only.

SECTION 9: BATTERY, MIRROR, MIRROR, RADIATOR, FAN BLADE, WATER PUMP, AND OIL COOLER

1. Batteries can NOT be mounted in the driver's compartment. All Battery cables and battery cable ends must have a non-conductive covering to prevent electrical contact with any part of the race car creating electrical shortage.
2. (1) battery disconnect is required to be installed to the negative battery cable. Must be in reach of the driver near the shifter or on the deck behind the driver seat accessible to safety crews. Recommended: to have the disconnect mounted in both locations.
3. No mirrors permitted inside or outside of car.
4. Only 1 radiator permitted for the purpose of cooling water. Radiator must be mounted in front of the engine.
5. Water pump must mount in stock location.
6. No electric fans permitted. No flat bladed fans permitted (Electric fan permitted with ct525)
7. Oil reservoirs must be mounted in front of rear end housing.
8. Oil reservoirs or oil coolers cannot be mounted inside of driver's compartment.
9. Radiator overflow tube must exit towards the ground.

SECTION 10: BODIES

- A.) Nose piece and roof must match body style of car.
- B.) All cars must have a minimum of one half inch (1/2") and a maximum of two (2") inches of roll at top of fenders, doors, and quarter panels. A sharp edge or angle will not be permitted. Body roll must go from sides over interior, not interior over sides.
- C.) Floorboards and firewall must cover the driver's area and be constructed to provide maximum safety.
- D.) Driver's seat must remain on the left side of the drive line.
- E.) Front window bars are mandatory.
- F.) Legible numbers, at least eighteen inches (18") high are required on each side of the car and roof.
- G.) No fins or raised lips of any kind are permitted anywhere along the entire length of the car.
- H.) Right side body line must be straight from front to rear with a one-inch (1") tolerance up and down, left and right.
- I.) No "slope noses" or "wedge cars" permitted. Noses must be stock appearing, subject to Series template.
- J.) No "belly pans" or any type of enclosure on bottom of cars will be permitted. Skid plate to protect oil pan is permitted.
- K.) No wings or tunnels of any kind are permitted underneath the body or chassis of the car. A maximum of one (1) stone deflector, for rear mounted oil pumps, oil filters, and for the main oil tank will be permitted. The deflector may be made of steel, aluminum, carbon fiber, or heavy gauge wire. Can run from rear of motor mount to in front of the four bar brackets not to cover bracket. Not to be above the top frame rail. Not to exceed below the bottom frame rail.
- L.) All body panels must be solid. No holes, slots, or air gaps are permitted. NACA ducts or NACA style ducts are not permitted. One hole for interior (deck) mounted oil cooler is permitted.
- M.) All non-approved bodies or any section/s of the body can or will be assessed a fifty pound (50#) minimum weight penalty at the discretion of the Technical Director.
- N.) No panels of any kind under the rear deck running from the front to the rear of the car. Bracing from fuel cell top from front to rear is legal.
- O.) Any air cleaner scoops used must be positioned in front of or around the air cleaner and cannot exceed one (1") inch in height above any part of the air cleaner. The scoop cannot be designed with fins or raised edges to direct airflow. The scoop cannot extend behind the rear of the air cleaner and must have a maximum width of seventeen inches (17") at the rear, with a maximum of ten inches (10") width at the front and cannot have more than one inch (1") opening in height at the front.
- P.) No cockpit or driver adjustable shocks, hydraulic or pneumatic weight jacks, trackers, MSD boxes or similar adjustable components of any kind are permitted inside the cockpit of the car. Taping over of any adjuster is not permitted. The offending component must be removed from the cockpit.

10.2: Stock Nose Pieces

- A.) Technical Inspector must approve all stock nose pieces.
- B.) Nose pieces must be made of molded type material.
- C.) Two (2) piece noses must be fastened together in the center. No spacers to gain width or cutting to narrow overall width of the nose are permitted.
- D.) The nose must be mounted flat where filler panel and nose piece meet. Nose piece may not be altered from its original shape. Nose piece will be checked with a template. Nose will be pushed against mounting supports to gauge its profile against template.
- E.) Adding to the bottom of the OEM valance to achieve lower ground clearance is not permitted.
- F.) A stock nosepiece can extend a maximum of fifty-two inches (52") from the center of the front hub to the farthest point extending forward. (1" Tolerance)
- G.) Front fender flairs must be made of plastic and cannot alter the original shape of the nose piece. The front fender flairs cannot extend beyond the front tire more than one inch (1") in width with wheels pointed straight.
- H.) Front fender flairs must have collapsible support.
- I.) Front fender flairs can extend a maximum of three inches (3") above the fender tops and hood.
- J.) Front fender flairs can extend a maximum of four inches (4") above where the filler panel meets the hood.

- K.) The front and sides of nose panels cannot be cut or altered, with the sides mounted no lower than 4 inches from the ground with the car at racing height. The sides of the nose panels must be parallel to the ground.
- L.) The racetrack officials must approve any bars ahead of the nose panel.

10.3: Roof and Roof Supports

- A.) The roof length size must be a minimum of forty-four inches (44") to a maximum of fifty-four inches (54").
- B.) The roof width size must be a minimum of forty-eight inches (48") to a maximum of fifty-two inches (52").
- C.) Roof must be stock appearing and mounted directly to roll cage with no more than a 1/2" spacer.
- D.) Roof height must be between forty-five inches (45") and forty-eight inches (48") from the ground.
- E.) A maximum one and one-half inch (1.5") roll, turned downward, is permitted along the front edge of the roof. A maximum one-inch (1") **ninety-degree (90°) bend** is permitted along the rear edge of the roof. (Roll permitted to help strengthen roof).
- F.) A maximum one and one-half inch (1.5") roll, turned downward, is permitted along the front edge of the roof. A maximum one-inch (1") roll turned downward is permitted along the rear edge of the roof. (Roll permitted to help strengthen roof).
- G.) No odd shaped roofs permitted.
- H.) All roof side (sail) panels must extend to the edge of the body. Maximum (no tolerance) right side sail panel size – seventeen inches (17") at the top and forty-three inches (43") at the bottom. Maximum (no tolerance) left side sail panel size – seventeen inches (17") at the top and forty-three inches (43") at the bottom and minimum fifteen inches (15") at the top and forty inches (40") at the bottom. The window area may be covered with clear Lexan or transparent material. Both roof support openings must be covered or both must be left open, if left open the openings must maintain a border frame of 2-3" at the top and sides and 3" at the bottom. Decals will be permitted but must meet the dimensions in the drawing and must be approved by the Technical Inspector. Maximum two-inch (2") radius (No Breaks) in either direction in rear roof side panels is permitted.
- I.) Sail Panel Windows Openings must be a border frame of 2-3" at the top and sides and 3" at the bottom with no tolerance +/-0"
- J.) Front posts must be flat and in uniform width from top to bottom – a minimum of two inch (2") and four inch (4") maximum width. Left and right sides must match in size.
- K.) Front posts must be flat and in uniform width from top to bottom – four inch (4") maximum width.
- L.) Left side of car sun shields, **three-inch (3")** maximum, must be able to hinge for easy exiting of car.
- M.) Roofs may be made of fiberglass or aluminum, but must meet specifications as set forth in the rules and must be approved by the officials.

10.4: Front Fenders and Hood

- A.) Hood can drop one-inch (1") with a one-inch (1") tolerance measured at the back edge of the hood and in front of the carburetor from left to right side of car. Fenders must taper from outer edge to hood in a straight line. Fender material must be flat with no bubble. Fender top must have ten inch (10") minimum width.
- B.) Fenders are not permitted to gain height from rear to front of car. Will check with a string from the top of the quarter panel at the spoiler to the top of the highest point of the fender. Must be flat (1" tolerance)
- C.) No part of fender or hood can be outside of the body line.
- D.) The front fender can be a maximum of thirty-six inches (36") in height. Height is measured vertically from the ground to the top of the fender behind the front tires.

10.5: Doors

- A.) Door to door cannot exceed seventy-seven inches (76") in width at the top of the doors. (1" tolerance)
- B.) Door to door cannot exceed eighty-nine inches (89") in width at the bottom in the center of the car.
- C.) At no point can the door sides break in towards the center of the car between the top and bottom. One-inch (1") tolerance including plastic.
- D.) The minimum ground clearance permitted is three inches (3").

10.6: Quarter Panels

- A.) Quarter panel can be a maximum of forty-nine inches (49") from center of rear hub to rear edge measured horizontally. Quarter panel can be a maximum of fifty-four inches (54") from center of hub to rear t-bar at spoiler.
- B.) Tire clearance from body must be a minimum of two inches (2"). No wheel skirts permitted.
- C.) At no point can quarter panel sides break in towards center of the car between the top and bottom. One-inch (1") tolerance including plastic.
- D.) Right side quarter panel must be straight in line with the door. Will check with a string from the top of the quarter panel at the spoiler to the top of the highest point of the fender. Must be straight with a one-inch (1") tolerance.
- E.) Left rear quarter panels must extend downward from the deck a minimum of thirty-three inches (33") and a maximum of thirty-six inches (36") including the plastic. Measured at the front and rear of the quarter panel. Right rear quarter panels must extend downward from the deck a minimum of twenty-seven inches (27") without the plastic and thirty-one inches (31") with plastic. Measured at the front and rear of the quarter panel. One-inch (1") tolerance.

10.7: Frames

- A.) No aluminum frames or bumpers permitted in construction of car.

- B.) Minimum 103" - Maximum 105" wheelbase.
- C.) Rectangle or Square Tubing: i.) The frame of all cars must be constructed of two two-inch by two-inch (2") minimum rectangular or square tubing with a minimum of eight-inch (8") circumference and a minimum of eighty-three thousandths inch (.083") wall thickness.
- D.) Round Tube Frame: i.) The frame of all cars must be constructed of a minimum of one and three-quarter inch (1¾") round tubing and must have a wall thickness of eighty-three thousandths inch (.083") wall thickness minimum.
- E.) If rear bumper is stubbed, it may only extend a maximum of eight inches (8") beyond frame. Any stubbed rear bumpers that extend eight inches (8") or more beyond frame must be rounded and directed towards the front of the car.
- F.) It is recommended that all cars be equipped with a tow hook or strap.
- G.) All battery supports must be braced in two axis - two horizontal and one vertical.
- H.) All frame and chassis components must be welded or bolted together. No sleeves, slip couplings. etc.

10.8: Roll Cages

- A.) Cars must have a suitable steel roll cage in driver's compartment.
- B.) Side roll bars are mandatory and must extend into the door panels.
- C.) A minimum of three (3) bars must be used on the left side of the car. Each bar must be a minimum of one and one-half inch (1½") in diameter with a minimum thickness of ninety-five thousandths inch (.095").
- D.) Roll cage must be welded to the frame.
- E.) Roll cage must be above the driver's helmet. 38" minimum between floor pan and the bottom of the roll cage
- F.) No "fin-shaped" or "foil-shaped" add-ons permitted on any part of the roll cage. The entire roll cage must be constructed of round tubing only.
- G.) Roll cage padding certified to SFI Spec 45.1 is required anywhere the driver's helmet may contact the roll cage while in the driving position.

10.9: Interiors

- A.) Interior is permitted to be dropped to the middle (just behind the seat) of the car a maximum of five inches (5") below the top of doors and a minimum of twelve inches (12") below the roll cage.
- B.) Interior must be fastened flush at the top of the door and quarter panels and must taper gradually towards the center of the car. Maximum of seventy-degree (70°) angle from the deck.
- C.) Interior must run in a straight line from behind the driver's seat to the rear spoiler.
- D.) Interior (deck) must run in a straight line (vertical and horizontal) across the back of car at the spoiler.
- E.) All interiors must be made of aluminum.
- F.) If interior is flat through the car, it must maintain a twelve-inch (12") clearance from roll cage for easy exiting from either side of the car.
- G.) Cowl (driver protection) panels in front of the driver may have a maximum of three inches (3") in height. The cowl panel must taper to the deck or end in line with the steering wheel.
- H.) If interior is dropped at firewall/back of hood, that portion of the firewall must be filled in vertically with aluminum. Interior may be dropped a maximum of two inches (2") from the top of the hood.

10.10: Spoiler

- A.) Rear spoiler must be manufactured of material of adequate strength, such as Lexan, Aluminum, or Carbon Fiber.
- B.) Rear spoiler material maximum eight-inch (8") height measured from deck to tip of material. Maximum seventy-two-inch (72") width between outer edges of spoiler sides.
- C.) Rear spoiler is not permitted to be suspended above the deck to create a "wing effect."
- D.) Rear spoiler must begin where quarter panels end. No extended decks permitted.
- E.) Maximum of three (3) rear spoiler supports. Option of two (2) additional one-inch (1") aluminum braces.
- F.) Spoiler supports cannot be mounted wider than the top of the quarter panel.
- G.) Spoiler must be straight (vertical and horizontal) where it mounts to interior (deck) panels.
- H.) All spoiler braces will be required to fit the series template, be no higher than 4" at the front of the base and can be no higher of extend rearward past the rear spoiler.
- I.) Spoiler braces will be permitted to have up to a ½" break in them.

10.11: Covers

Car opening covers are not permitted. Exception: in the event of rain or inclement weather you may cover your car until the weather passes or the rain stops.

SECTION 11: WEIGHT RULES: All weight rules are to be met after all races.

Motor, weight, and restrictor package may be changed at any time as determined by Series Officials to equal the package for all competitors.

1. STEEL BLOCK ONLY: 602, 604 GM crate Motors, 2200 lb. weight minimum with up to a 10" spoiler with the standard 8-inch braces. **E85 Fuel will be allowed on the 602 and 604 GM crate motors.**
2. STEEL BLOCK ONLY: Complete IMCA Spec Motor 2325 lbs. **Maximum 10.5 to 1 compression ratio. Chevrolet Read intake manifold Section 6 Rule #4.**

3. STEEL BLOCK ONLY: Wissota Spec Motor with a maximum 14.1 to 1 compression ratio must weigh 2350 lbs. with (4) 1.250 restrictors and not allowed to run alcohol (unless otherwise stated).
4. STEEL BLOCK ONLY: 364 or smaller all steel engine with compression ratio 11 to 1 or less must weigh 2325 lbs. and will be allowed 10-inch spoiler with standard 8-inch braces. (compression ratio of 11.1 to 1 up to 14.1 to 1, 2400 LBS.) with 8-inch spoiler and 8-inch braces. Both compressions must meet rules section 2-5 (a through I)
5. STEEL BLOCK ONLY: Over 364 cu in motor with standard valve angle ported steel heads, maximum 14.1 to 1 compression, must weigh 2350 lbs. with (2) at 1.100 restrictors and (2) at 1.050.
6. A.) STEEL BLOCK – ALUMINUM HEAD: Chevrolet Motors with track 1 style head Under 374 cu in. with a maximum 14.1 to 1 compression ratio with a 23-degree valve angle of plus or minus 2 degrees with the valve center of 2.350 to 2.354 must weigh 2350 lbs. with (4) at 1.100 restrictors.
 B.) STEEL BLOCK – ALUMINUM HEAD: Chevrolet Motors Under 374 cu in. with a maximum 14.1 to 1 compression ratio with a 23-degree valve angle of plus or minus 2 degrees with the valve center of 2.349 or less must weigh 2350 lbs. with (2) at 1.100 restrictors and (2) at 1.050 restrictors.
7. A.) STEEL BLOCK – ALUMINIUM HEAD: Chevrolet Motors with track 1 style head Over 375 cu in. with a maximum 14.1 to 1 compression ratio with a 23-degree valve angle of plus or minus 2 degrees with the valve center of 2.350 to 2.354 must weigh 2350 lbs. with (4) 1.050 restrictors.
 B.) STEEL BLOCK – ALUMINUM HEAD: Chevrolet Motors Over 375 cu in. with a maximum 14.1 to 1 compression ratio with a 23-degree valve angle of plus or minus 2 degrees with the valve center of 2.349 or less must weigh 2350 lbs. with (2) at 1.050 restrictors and (2) at 1.000.
8. GM ct525 minimum weigh 2350 lbs. with up to an 8" spoiler.
9. Open Aluminum or steel motors with unrestricted valve angle 365 cubic inch or less with a maximum 14.6 to 1 compression ratio must weigh 2400 lbs. with restrictors (4) 1.000 restrictors.
10. Open Aluminum or steel motors with unrestricted valve angle 366-400 cubic inch with a maximum 14.6 to 1 compression ratio must weigh 2400 lbs. with (2) 1.000 restrictors and (2) 0.950 restrictors.
11. Open Aluminum or steel motors with unrestricted valve angle 401 cubic inches and larger with a maximum 14.6 to 1 compression ratio must weigh 2400 lbs. with (4) at 0.950 restrictors.
12. 45 lbs. of weight in block form weight in pieces no less than 5-pound pieces is required in front of rear motor plate with Aluminum block motor except the 525 motor will add 20 total pounds in front of the rear motor plate
13. Any lightened steel blocks will have to add 15 lbs. of weight in block form no less than 5 lb. pieces in front of the engine plate.
14. ~~In the future, an LS style engine is being worked on~~
15. All weights must be in block form of no less than 5lbs and must be painted white with the car number on them.
16. All weight must be bolted to the frame of the car in a secure manner. Should use at least 2 half inch bolts for each weight that is bolted to the car. No stacking of weights permitted.
17. Any weight mounted behind the fuel cell must be mounted below the frame of the car.
18. Mounting of weight inside of the driver compartment or above the interior of the car is NOT permitted.

SECTION 12: TIRE RULE

1. Hoosier WRS or WRS-2 with the D55 compound will be the series tire rule exceptions below.
2. 11.0/88, 11.0/90, or 11.0/92 only will be permitted.
3. NO grooving, siping, or needling or altering beyond 24 grit sandpaper in removing the glaze will be allowed in 2019 or will result in disqualification.
4. All tracks east of Highway 169 (through Iowa) Knoxville, Marshalltown, Webster City and I-35 in Missouri; siping of the front tires ONLY will be allowed.
5. We are looking into a tire stamping rule on 1 to 4 tires. Decision to be made before the season starts.
6. The composition and character of the tire may not be altered from original. This includes NO soaking, softening, conditioning, chemicals of any kind or recapping. D-55 tire should be no softer than 55 points on the durometer, warmers and any other means of artificially warming tires are prohibited.
7. Recommended washing tire with water only. Warning soaps and cleaning products may be detected as chemicals or altering the tires and is subject to disqualification, fines and suspension.
8. You may only use sandpaper up to and including #24 grit to remove the glaze on the top layer of tires. When you are completed with the sanding of the tires, the edges of the tread block must remain the same as the edge of the block next to it. You will only be able to create the look of a worn tire and not something of a different tire face appearance (example: no wavy tread pattern or deep grinding will be allowed). Metal grinding disks are not permitted
9. All competitors choosing to use grooved or ungrooved tires in the heat race must use the same combination in all remaining races/feature(s). Unless ok'd by tech official.
10. Tire protest: Any driver, owner, or crew chief competing in the A feature event (must take a lap) are eligible to protest tires for chemical compounds or conditioning. Cars being protested must have finished in the top 5 A feature positions. Protest fee will be \$300 for 1 tire – 1 test. All other tires on the same car can be tested for an additional \$250 per tire. Totaling \$1050 for all 4 tires on the same car being protested at the same event. Protest must be cash and bills must be in denomination of not less than \$20.
11. Tire protest and money must be presented within 15 minutes of the drop of the checkered flag to one of the MBSLM tech officials. Winnings of the protested tire will be held until test comes back along with any other winnings made until the tests come back.

12. Tire Sample(s) will be cut with a blade/tool provided by the person being protested.
13. Denial Refusal of Tire protest will result in a Disqualification for that night (loss of both winnings & points) Loss of 100 additional points & a \$500 fine due before you can compete at a Malvern Bank SLMR series event again. Protester will receive his/her money back if protest is denied.
14. If testing proves tire sample to be illegal you will lose winnings for the night you were protested and all points accumulated in the season up to the protested date. \$500 fine due before you can compete with the Malvern Bank SLMR series again. You will not be able to compete in the next 3 MBSLM series events (not to roll over into the following season.)
15. If Protested tire comes back to be illegal the person who protested the tire(s) will receive the Protested driver's winnings for that event up to the amount that was used to protest.

SECTION 13: WHEELS AND BRAKES

1. Brakes, Brake Components, Wheel Hub:
 - a) Brake calipers must be manufactured of aluminum.
 - b) The brake caliper including brake caliper pistons must be used as produced by the brake caliper manufacturer.
 - c) Brake rotors must be manufactured of magnetic steel, stainless steel or cast iron.
 - d) Brake rotors must be used as produced by the brake rotor manufacturer.
 - e) Wheel hubs must be manufactured of aluminum or magnesium.
 - f) Wheel hubs must be used as produced by the wheel hub manufacturer.
 - g) The combined weight of the wheel hub, wheel bearings and seal, spindle nut and washers, brake rotor and attaching hardware, the axle cap, and the wheel spacer must not exceed 27 pounds.
 - h) All brake lines must be metal. No plastic lines, Brake hoses must be steel braided.
2. Wheel, Wheel Discs, Wheel Spacers:
 - a) Only aluminum wheels will be permitted. Maximum wheel width 14". Bead locking devices permitted on all 4 corners.
 - b) Only approved wheel discs will be permitted. Approved wheel discs are wheel discs that are fastened to the wheel using a minimum of three (3), 1/4 or 5/16-inch diameter magnetic steel hex head bolts. Foam style mud plugs are permitted.
 - c) Only aluminum wheel spacers will be permitted. Maximum 2 1/2".
 - d) The combined weight of the wheel, wheel hardware, wheel disc and fasteners, and tire must not exceed 40 pounds*. *The maximum combined weight in this rule is based upon current tire rules and may need to be adjusted in the event of an alternate tire.

SECTION 14: DECALS

1. **The Malvern Bank SLMR Series logo decal must be on the outer most 8" tall spoiler braces, both sides.**
2. **The Malvern Bank logo OR words 'Malvern Bank' must be on the bottom of the sail panels, directly behind the driver. This logo can be colored to match the color of your car/wrap but must be distinct and legible. If Malvern Bank is included as a major sponsor on the car it is ok to run without the 'Malvern Bank' words on the sail panels.**
3. **Recommended the nose piece must have a headlight decal package attached.**
4. **Mandatory contingency decals include: Speedway Motors, Predator Trailers, VP Fuels, Keyser Manufacturing, Hoosier Tire, JE Pistons, and Helmet Head Design. (Storm Solution Specialists mandatory for rookies)**
5. **Optional contingency decals: (IF THESE DECALS AREN'T ON YOUR CAR YOU WON'T BE ELIGIBLE FOR THEIR SPONSOR BONUSSES) Beyea Headers, Braswell Carburetion, Brinn Transmission, Dynamic Drivelines, Hooker Harness, Kosiski Auto Parts, Keizer Wheels, MyRacePass, N&W Transfer, Out-Pace Racing Products, Penske Shocks, Performance Bodies, Real Wheels, Rod End Supply, Roth Racing, Sardeson Racing, Simpson Performance Products, Swartz Chassis, Wehrs Machine, and Zeitner and Sons Transport.**

SECTION 15: LINEUPS AND PROCEDURES, TIME TRIALS AND PASSING POINT PROCEDURES

Option whether to draw or time trial will be determined by MBSLMR Series Staff and Track Officials.

- A. **OPTION 1: TIME TRIAL PROCEDURES**
 1. Time trial order will be determined by draw at the MBSLMR Series Trailer unless otherwise stated.
 2. Time trial points will be used to line up the heat races. (See point system below)
 3. **The decision of time trials being one group or group A - group B qualifying format will be determined pre-qualifying by the SLMR Series officials. Group A results will determine the line-ups for heats 1 and 2; Group B results will determine the line-ups for heats 3 and 4. If the A-B Group format is used time trial points will be awarded for both groups, 200 for 1st, 197 for 2nd, 194 for 3rd, etc. If we use one group for time trials, points will be awarded based on overall time trial results.**
 4. Fastest time will be in the first heat, second fastest time will be in the second heat, third fastest in the third heat, and so on. Top 6 cars in each heat race will be inverted based on time trials points.
 5. There will be finishing points for the heat races. (See point system below)
 6. Total points of time trial and heats will determine starting line-up for the features, both A and B features.

7. Ties in points will be broken by time trial time.
8. If you don't make a time trial attempt you will receive 3 points less than the driver who timed in the slowest. In the event that multiple drivers don't make a time trial lap will be scored in the order of their pill draw.
9. If your transponder doesn't read, we will allow a transponder change and another timed session to be recorded UNLESS your transponder is mounted incorrectly causing the transponder not to read in the first place. It is the team's responsibility to make sure the transponder is mounted correctly.
10. If a driver brings out the yellow flag during time trials, they will only get a chance to run one timed lap in their required session. If a driver completes a lap before the yellow comes out that lap will be scored and they will not have a second lap. All other drivers in the time trial session will get a total of 2 timed laps, if the driver who didn't bring out the yellow completes a lap before the yellow, they will have one lap after the yellow, if they didn't complete a lap they will run both laps after the yellow. If a driver misses their assigned qualifying group (3-5 cars) a driver will only get one timed lap, this will be at the end of their assigned group A or B. If a driver misses their assigned qualifying group, they will score last place points for assigned qualifying group A or B.
11. If multiple drivers do not record a timed lap in a group, points will be awarded based on the draw. Lowest number draw will be scored higher in the results.

Point system are as follows: Time trials, 1st. 200, 2nd. 197, 3rd. 194, etc. decreasing by 3.
 Heat races, 1st. 150, 2nd. 144.7, 3rd. 139.4, etc. decreasing by 5.3.

B. OPTION 2: PASSING POINT PROCEDURES

1. All drivers will draw for heat races.
 1. If draw is used for opening night/weekend whether that be 1-2-3 consecutive races will be standard draw-and redraw of top 6 in passing points.
 2. If draw is used after opening night/weekend draw will be divided by top down split draw. Example: If there are 3 heats 1st-2nd-3rd place in points standings will be in different heats by draw with the group containing the lowest pill draw by all drivers in the first heat.
2. If pill draw is used it will be done at the drivers meeting after the initial race/race weekend.
3. Draw for heat race starting positions with a passing point system of 1.76 per car for A Feature
4. All cars not drawing or choosing to start in the back of their heat will not receive passing points, only finish points in the heat.
5. Passing points will be scored off the first green flag.

C. QUALIFYING PROCEDURES THAT ARE THE SAME FOR OPTION 1 OR OPTION 2

1. No car/driver will be allowed to change their assigned heat race or B-Feature. When there are 2 B-Features the Race Director may reassign B-Feature line-ups.
2. Top 14 go to the A based on points (except in rare instances which will be announced pre-race), Rest to the B Feature(s). This procedure may be different on two day shows. Will be announced prior to qualifying.
3. The top 6 in points after the heats will be inverted based on the last completed MBSLMR feature with any driver that didn't compete at the last event starting at the back of the 6-car invert. If more than one car is new the 2+ cars will be started heads up at the back of the 6-car invert based on points after time trials and heat races. (exception season opening race, top 6 will be inverted by total heat race and time trial points) Unless otherwise stated.
4. Drivers can make an attempt to qualify through the B Feature without taking a green flag lap prior to the start of the B. Driver will start at the rear of the B Feature field.
5. 18 Cars will qualify to start the A feature event through line-up points/b-feature transfer(s) unless 30 or more cars are in attendance. Then 20 cars will make the A feature event through line-up points/b-feature transfer(s). Except in rare instances: promotor or sponsor additions or provisions.
6. DRIVER CHANGE, CAR CHANGE, AND PROVISIONALS:
 - a. **A driver that doesn't have a provisional or doesn't want to use their provisional:** A driver change can happen with a qualified A-Feature car. An A-Feature qualified driver may relinquish his driving duty to another driver/competitor before the green flag of the main event. Driver must start last in the field in the qualified car. The driver taking the original green flag in the qualified car will receive the points and pay of where the car finishes in the feature. The driver that relinquished the A-Feature qualified position will be awarded the points and money of the driver they relinquished their car to. This will not be considered a series provisional to the new driver.
 - b. **A driver that has a provisional but has taken a green flag in any time trials or qualifying race:** Driver can use his primary car or any car that has taken a green in any time trials or qualifying race that evening to use their provisional. This does not have to be a A-Feature qualified car.
 - c. **A driver that has a provisional that has not taken a green flag in any time trials or qualifying race:** Driver can take any car that has or has not taken a green flag for any time trials or qualifying race including their primary car or competitor's back-up car to use for their provisional
 - d. **Driver Provisionals:** You must be an MBSLMR member, your car must be legal to enter the race track for the feature event. Selected drivers for the provisional spot will be the highest two drivers in points not already qualified for the A-Feature (must have a provisional remaining to use). These two provisionals will be in addition to the 18/20 cars (depending on car count) that make the A Feature event through line-up points. If there are no provisional driver(s) to accept these 2 spots, the next 2 cars in the B Feature will move on to the A Feature to make a total of 20/22 cars in the A Feature. 2 provisionals will be awarded to all paid MBSLMR members, a 3rd

provisional will be awarded after a driver completes their 10th MBSLMR event of the season. You will be asked about the acceptance of your provisional after the B-Feature. Once you accept your provisional, if you do not start the A-Feature you will be scored in last place and your provisional will be counted as used. The first two races of the year, provisionals will be based off the previous years' final driver point standings.

- e. **Promoter Provisionals:** Up to 2 cars (This would be in addition to the 20/22 Qualified cars/Provisionals), will be permitted at the promoter's expense, and the promoter provisionals must start behind the MBSLMR provisionals. Track promoter will give us the names of the driver they've selected as provisionals. Promoter can select a series regular that has not made the show but selected driver must comply to all rules listed above to receive points.
 - f. **Back-Up Car:** A driver can change to a back-up car or another competitor's car after hot laps before making a qualifying attempt of any kind. Hot laps are not considered a qualifying attempt. After any lap taken other than hot laps a back up car is not allowed.
7. A Lap will be scored when 2 or more cars have passed the start/finish line. All cars that have not crossed the start finish line prior to the yellow or considered involved in the yellow will be scored as they were running at the last completed lap. Cars involved being scored to the rear of the field of the completed lap. i.e. Split Scoring.
 8. In the event of a caution on a checkered flag lap, the race is completed if the leader has crossed the start finish line and taken the checkered flag. All cars that have not crossed the start finish line prior to the yellow or considered involved in the yellow will be scored as they were running at the last completed lap. Cars involved being scored to the rear of the field of that completed lap. i.e. Split Scoring.
 9. Heat race & B Features will restart single file.
 10. A Features will use Delaware double restart. Single lead car with double file behind, second place car choosing high or low. With 3 laps or less remaining all restarts will be single file. Due to track conditions or other circumstances in rare instances the officials can choose to change to a single file restart.
 11. Any driver with 2 single car yellows will be asked to go to the pits.
 12. A hot lap session is not considered a qualifying attempt. A driver is not locked into a car that they have hot lapped or practiced in pre-qualifying.
 13. Hot lap sessions after heat races, not open to all drivers will result in the driver starting in the rear of the next feature race they are in that night. These hot laps must be approved by an official and are used only in rare instances.
 14. To be eligible for Rookie of the Year, a driver must not have qualified for more than 6 feature races in any one previous season and must register with Lisa as a rookie.

D. Lucky Dog Award

1. In only the feature event, at each caution flag one car will be given back a lap to the field.
2. The Lucky Dog Award will be given until 3 or less laps remaining in the A-Feature event.
3. The highest running lapped car that is not involved in the caution flag will be given one lap. In order to receive the lucky dog award, the driver and race car must remain on the track. Drivers must not pit under the yellow to be eligible. The lucky dog race car may pit during the next yellow after the race has restarted.
4. A driver can only receive one lucky dog per race. In the event that the highest running lapped driver has already received the lucky dog the next highest running driver that is not involved in the caution will receive the lucky dog.
5. The lucky dog must restart at the rear of the lead lap cars.

Section 16: PURSE AND POINTS

- A. A feature winner will receive 100 points, second place will receive 96, from there back each position will drop down by 2 points 94-92-90 so on with the minimum A-Feature points being 50 pts.
- B. The highest non-transfer car(s) from the b-features/last chance races will receive 48 points, second place will receive 47, from there back each position will drop down by 1 point 46-45-44 so on.

Standard Payout – A feature

1 st	\$2,000.00
2 nd	\$1,500.00
3 rd	\$1,000.00
4 th	\$800.00
5 th	\$700.00
6 th	\$600.00
7 th	\$500.00
8 th	\$475.00
9 th	\$450.00
10 th	\$425.00
11 th -20 th	\$400.00

1 - B-Feature

First non-transfer	\$300
Second non-transfer	\$250

Third non-transfer	\$200
Fourth non-transfer	\$150
All remaining cars	\$100

2 – B-Features – based on car count and track size

First non-transfer	\$200
Second non-transfer	\$175
Third non-transfer	\$150
Fourth non-transfer	\$125
All remaining cars	\$100
